

Soft Skills Assignment

Module 3) Projects

Describe a project you have worked on or are currently working on.

During my bachelor's, I did a project on a Shopping website that I referenced from a local shop. They also have an offline store but wanted to make it online.

Explain the technologies used, the scope of the project, and its objectives.

The project was about curtains made in ASP.NET.

The scope of the project was people who are far from the shop would purchase online.

The objective of the project is to increase sales of the product online. So that shop had more clients rather than an offline store.

Highlight the challenges faced and how you addressed them, showcasing your problem solving skills.

The challenges I faced were that, data-based connectivity and adding payment methods.

By the completion of the project, I watched online solutions like some YouTube videos, and some blogs and, also took our professor's help to solve the problems.
